

## Dalibor Kovář

Partner

Dalibor Kovář specialises in electronic legal acts and related digital transformation in the field of law, information technology, innovation and the industries of the future, Intellectual property law, entertainment, cybersecurity, and contract law.

In the area of digital transformation, Dalibor mainly focuses on introducing appropriate principles of electronic legal acts in both public and private organisations, using electronic identity, and their legal sustainability. He assists with the practical and strategic development of digital solutions for the Czech market and engages in the establishment of technology partnerships. In recent years, as a representative of the professional public, he has participated in drafting key digitisation legislation (eGovernment) and a commentary to the Act on the Right to Digital Services. Dalibor regularly publishes specialist articles, lectures at the HAVEL & PARTNERS Academy and attends specialised conferences

in this field.

In the area of intellectual property and information technology law, Dalibor primarily focuses on the legal regulation of the use of innovative technologies and the industries of the future in general and specifically in the financial sphere, advising on comprehensive technology transactions, commercialisation of technological solutions, legal issues of domain names, prevention and subsequent measures in the wake of cyber incidents, protection of copyright works, and support of technology partnerships.

In the entertainment industry, Dalibor focuses on documentation for content creation and distribution, legal regulation of online technologies and streaming platforms, protection of intellectual property rights and liability for content. In contract law, he focuses on drafting specific and comprehensive commercial documents, including contracts containing international aspects, and analysing complex contractual relationships.

Prior to joining our law firm, Dalibor worked at a major Czech law firm for several years and for a year in the then largest French law firm Gide.

### Projects

- advising major entities in the Czech financial sector on the implementation of fully electronic processes and electronic identification, including negotiations with ministries and regulatory authorities
- advising on the digitisation of the HR agenda and long-standing active efforts to digitise the Labour Code
- providing repeated legal and technical assessments of leading solutions ensuring electronic signatures and the remote identification of persons
- co-participating in the preparation and negotiation of the legislative proposal for the introduction of the so-called banking identity and the Act on the Right to Digital Services
- advising major local and international clients across business sectors on the review of contractual documentation in connection with the digital transformation of their business
- advising on the commercialisation of a major software solution
- advising a leading Czech software supplier in a dispute with its customer
- advising a global provider of road traffic supplies and services on the obligation and copyright aspects of contractual documents
- advising several leading retail chains on the comprehensive regulation of legal relations with consumers, including the comprehensive regulation of e-shops
- advising major Czech companies on licensing and technology transfer to foreign countries
- ongoing advising on technology law related to due diligence audits of major Czech and multinational companies, including advising start-ups on local development and international expansion
- advising local and foreign companies on legal actions regarding unfair competition and infringement of their intellectual property
- advising clients on the acquisition and long-term operation of complex technological units
