

**Jiří Tregler**  
Senior Associate

Jiří Tregler specialises in asset structures, including trusts, endowment funds, and their international alternatives, as well as corporate law and related private client advisory.

Throughout his career, he has been instrumental in providing legal services related to the creation of fund and holding structures, transforming existing structures, and offering related advisory services.

Before joining our law firm, Jiří worked as a legal assistant, junior associate, and later as an associate at PORTOS law firm. He also held a position at CCS PREMIUM TRUST a.s., where he contributed to the establishment of trusts, endowment funds, and trust-like entities in the Czech Republic, Liechtenstein, the United Arab Emirates, the United Kingdom, the USA, and Luxembourg. In addition to his professional practice, he has conducted numerous training sessions in the Czech and Slovak Republics, participated in international conferences, and published a number of articles and publications on topics he had been dedicated to for a long time.

**Projects**

- Advising a state enterprise in the preparation of contractual documentation for major ICT projects
- Advising a U.S. trust structure on setting up distributions to beneficiaries
- Advising on the transformation of a holding structure in connection with Brexit
- Advising a client on entering foreign markets (Slovakia, Hungary, the United Arab Emirates, the United Kingdom, and the USA), including the integration of new companies into the existing structure
- Advising a prominent domestic company on setting up a project for the transformation of its holding structure and managing the entire process
- Advising a Czech developer on the sale of real estate assets within the Czech Republic and Spain
- Advising representatives of leading Czech and Slovak families on establishing and subsequently managing assets through trusts and endowment funds
- Advising on company acquisitions related to the expansion of a client's business activities, including setting up related internal structure
